Profile

I am a motivated and detail-oriented Computer Engineering undergraduate at VIT Mumbai with a strong academic foundation and a clear career focus on software engineering. I have hands-on knowledge of web development fundamentals, including HTML, CSS, and Java, and I am actively building my skills through practical projects and continuous learning. I bring strong problem-solving abilities, effective communication, and a collaborative mindset, with a keen interest in developing efficient, scalable software solutions and growing as a professional software engineer.

PERSONAL PROJECTS

Food Guide, *HTML CSS*
Description
- Developed a static food website using HTML and CSS to showcase various food items and categories in a visually appealing manner. Designed a responsive layout with attractive styling to enhance user experience and easy navigation. Focused on clean code, structured content, and aesthetic presentation, demonstrating strong fundamentals in web development and front-end design.

Al Tic Tac Toe Game, *Java, C*
Description
- Built an interactive Tic-Tac-Toe game in C with an Al opponent using the minimax algorithm to make optimal moves. Implemented logic for win/loss/draw conditions and a user-friendly console interface. This project strengthened my knowledge of C programming, algorithms, and problem- solving while applying Al concepts in a fun and engaging way.

Student Management System, *SQL*
Description
- Designed and implemented a Student Management System using SQL to efficiently manage student records including registration, courses, grades, and personal details. Created structured tables, applied normalization, and wrote queries for data retrieval, insertion, updating, and deletion. This project enhanced my understanding of database design, SQL queries, and data management concepts

Courses

The Complete JAVA certification course, *Udemy*
05/2025 – 11/2025

HTML CSS Basics, *Udemy*
01/2025 – 05/2025

Experince

CodeClause Pvt Ltd. (Software Engineering Intern) — Hands-on experience in software development during a 2-month internship at CodeClause Pvt Ltd, working on real-world tasks and projects.
